Information on Aluminium Frames 40 x 1.5 mm

■ LANCO Standard Frame

The frame is made of longitudinal seam welded aluminium poles with a diameter of 40 mm, wall thickness of 1.5 mm of the material AL Mg 4,5 Mn.

Yield strength: $R_{p0,2} = 330-340 \text{ N/mm}^2$
Ultimate strength: $R_m = 350-370 \text{ N/mm}^2$

Connections and baseplates are made of highly resistant aluminium.

Note:

All parts of the frame with the diameter 40 x 1.5 mm and 32.6 x 1.5 mm can be re-ordered separately in case of damage or lost. This accounts also to tent skins and accessories.

Labels and emblems can be put on all

Information on Frames of New and Old Dimension in Steel or Aluminium

Old dimensions are all poles with a diameter of 32.6mm.

Till the end of 1974 all frame tents had been equipped with poles made of steel 32.6mm x 1.2mm, till the end of 1978 with poles made of aluminium 32.6mm x 1.5mm.

tents. Costs on request.

Options for all tent types except for tents with a wall height less than 1.61 m

Connecting unit, roll-up facility of one panel or one side, windows, chimney passage, divisibility with loop closing, canopies, partition walls, second entrance and storm cords.

Fabric Specifications

LANCO-Heavy-Duty Fabric

LANCO tents are made of LANCO-heavy-duty fabric and available in following colours: off-white, olive, khaki, green and blue. LANCO-heavy-duty fabric is permeable to the air, rot-resistant, water pressure proof laminated and is extremely tear-proof as well as highly protective against UV-rays.

Fabric	
Twisted cotton-polyester 50%/50%	
Yarn Count	
50 tex x 2	
Yarn Density	(DIN EN 1049-2)
Warp 21.0/weft 15.6	
Weight per Unit Area	in g/m ² (DIN 12127)
440 g/m ²	
Breaking Force	(DIN 13934-1)
warp 2420 N/50 mm	
weft 1860 N/50 mm	
Water Pressure Resistant	(EN 20811)
approx. 500 mm water column	

Information on Tents with Loop Border

Tents with loop border are only for stationary tent camps with a certain wooden floor. The ground skirting (25cm width) is provided with loops every 40 cm, which must be fixed to the counterpart (crank) that is attached to the wooden floor.

Double-Sided PVC-Coated Fabric

Used for kitchen tents, exhibition and party tents, groundsheets and tent bags as well as tarpaulins and made-to-order articles. Deliverable single- or multi-coloured or striped coated, mat to glossy, flame-retardant according to national and international standards. Resistant against corrosion, air pollution, UV-rays and bacterial contamination.

Technical Data

1. For standard fabric for all tents (white or striped):

Support Fabric	(DIN 60001)
Polyester	
Yarn Count	(DIN 53830)
1100 dtex	
Yarn Density	(DIN 53853)
8/8 warp/weft per cm	
Weight per Unit Area	(DIN 53352)
approx. 650 g/m ²	
Breaking Force	(DIN 53354)
warp 2800 N/50 mm	
weft 2500 N/50 mm	
Flame Retardant	(DIN 4102 B1)
Yes	

2. For groundsheets, tent bags, ground skirting with anti-fouling protection in grey, both sides glossy finished:

Support Fabric	(DIN 60 001)
Polyester	
Yarn Count	(DIN 53830)
1100 dtex	
Yarn Density	(DIN 53853)
8/8 warp/weft per cm	
Weight per Unit Area	(DIN 53352)
approx. 550 g/m ²	
Breaking Force	(DIN 53354)
warp 800 N/50 mm	
weft 2500 N/50 mm	
Flame Retardant	(DIN 4102 B1)
No	

Connecting Tents

Tents with the same width can stand back to back and be connected. For this at least one tent needs to have a second entrance. A connecting unit will be needed to bridge the gap of approx. 30cm between both tents. This connecting unit must be fixed to both tents.

Cleaning Tent Skins and Tarpaulins.

Tent skins and tarpaulins are only allowed to be cleaned with clear, tepid water. Using chemical cleaning substances, the tent skin lamination will be damaged severely and irreparable. As a result the tarpaulin will leak water.

Washing tent skins in industrial washing machines let them shrink and damages buckles, toggles and tension rings. Because of all this we cannot recommend chemical cleaning or washing.

It is possible to re-laminate the tent skin. One liter of lamination agent is needed for approx. 6 m². Use a clean sponge or brush and apply only on a clean and dry tent skin.

Please always care for your tent. Always, but especially after cleaning or lamination, pack the tent skin only when it is completely dry. Packing it when it is wet or just humid will cause mould that cannot be removed anymore.

Changes which are in favour of technical advance are reserved to LANCO. All given measurements without limit of tolerance are parts with a tolerance of $\pm 5\%$. All data is made of today's state of knowledge for information without legally binding.
